

# Why Choose Invest?

Invest provides resources to teach insurance and career fundamentals in high schools and community colleges across the nation.

We offer textbooks (both hardcopy and eBook), detailed lesson plans, presentations, videos and quizzes to support traditional classroom learning.

Students gain real-life experience to enter insurance, risk management or any other career after graduation.

All resources are available at no cost thanks to the support of numerous insurance carriers, agencies and organizations.

Invest is easy to implement and provides students real-life experiences. Teachers find free materials, engaging classroom activities and connect with insurance professionals who want to teach and mentor students.

## OUR GOAL?

We want to help young people see the insurance industry as a rewarding and flexible career opportunity and help insurance professionals find new, talented professionals for internships, apprenticeships and entry-level positions.

**Nishka Ahuja**  
InVEST Grad &  
Scholarship Winner

“The InVEST program introduced me to the world of insurance. Next year, I plan to study business and statistics. I’m intrigued with the idea of pursuing a career in actuarial sciences and I see a lot of potential working in insurance.”

classroom

Invest offers classroom educators and volunteers use of our nationally-recognized 12-chapter insurance curriculum.

Not only do students learn the importance of insurance in personal finance, but local guest speakers bring these concepts to life by discussing their industry experience.

Instructors can  
choose from:

Introduction to Insurance

Risk Management

Auto Insurance

Homeowners and Renters  
Insurance

Commercial Insurance

Life and Health Insurance

Marketing and Sales Skills

Careers in the Insurance Industry

At Invest we help students  
learn about careers in an  
industry that's stable and rewarding.
