

**Nishka Ahuja**  
InVEST Grad &  
Scholarship Winner

“The InVEST program introduced me to the world of insurance. Next year, I plan to study business and statistics. I’m intrigued with the idea of pursuing a career in actuarial sciences and I see a lot of potential working in insurance.”

# INSURANCE EDUCATION & CAREER INTRODUCTION

## About the InVEST PROGRAM.

InVEST provides resources to teach insurance and career fundamentals in high schools and community colleges across the nation.

We offer textbooks (both hardcopy and eBook), detailed lesson plans, presentations, videos and quizzes to support traditional classroom learning.

Students gain real-life experience to enter insurance, risk management or any other career after graduation.

All resources are available at no cost thanks to the support of numerous insurance carriers, agencies and organizations.

The program is easy to implement. You start with a brief webinar from our program coordinator, followed by receiving login access to InVEST insurance education materials and ongoing support.

Besides classroom activities, guest speakers are also available for career days at your school. Should a student decide to pursue a career in insurance after they graduate, one of the guest speakers can mentor their journey. InVEST grads can also apply for a scholarship, and many become eligible for internships and entry-level positions.
